Methodology:

- 1) Columns C and F were calculated by subtracting the previous year's GF/K-12 appropriation from the current year's GF/K-12 appropriation.
- 2) Columns D and G were calculated by dividing each year's "Growth in \$" by the previous year's GF/K-12 appropriation to show the annual percentage change.
- 3) Column H was calculated by dividing Column F by Column C for each year to show what percentage of the growth in GF appropriations is attributable to K-12 appropriations growth.
- 4) The 28.85% for "K-12 aggregate budget growth as % of GF aggregate budget growth, FY 03-04 - FY 10-11" is the result of: (sum of the yellow cells in Column F) / (sum of the yellow cells in Column C).
- 5) The 49.64% for "K-12 aggregate budget growth as % of GF aggregate budget growth, FY 11-12 - FY 18-19" is the result of: (sum of the blue cells in Column F) / (sum of the blue cells in Column C).
